#### **OBJECTIVE**

I am enthusiastic about transitioning from the real estate industry, where I have accumulated 5 years of valuable working experience, to pursue a career in Web-development. My background in design, coupled with my recent completion of a bootcamp at the end of 2022 and my undergraduate degree in Information Technology from Coder Academy.

#### Key Skills and Qualifications

- Proficient in front-end technologies: HTML, CSS, GIT Version Control System, JavaScript, React.JS, SASS.
- Sound knowledge of back-end technologies: Ruby, Ruby on Rails, Postgresql.
- Great educational foundation in Information Technology from Coder Academy.
- Excellent communication skills, enabling the establishment of trust and credibility with clients.
- 5 years of experience in the real estate industry, demonstrating adaptability, multi-tasking, and effective prioritization.
- Adept at handling complex and high-pressure situations, demonstrating efficient problem-solving capabilities.

#### Summary

I have excelled in the real estate industry, delivering precise reporting, efficient multitasking, and building strong client relationships. My 5 years of design and marketing experience complement my transferable skills in front-end development. With a solid educational background and hands-on experience in both real estate and technology, I am eager to join a dynamic and innovative front-end development team.
